EDUCATION

Georgia Institute of Technology, Atlanta, GA

• Bachelor of Science in Computer Science - GPA: 4.00/4.00

August 2015 - Present

Expected Graduation: May 2019

SKILLS

Languages: C, C++, Java, Python, Assembly, HTML, CSS, JavaScript, TypeScript

OS: Linux, Windows, macOS

Technology: Android, Git, Maven, Bash, Beautiful Soup, Spring, Flask, Node.js, Electron, MongoDB, Solr,

Firebase, Angular, Bootstrap

EXPERIENCE

Software Engineering Intern - Site Team - NCR Corporation

May 2017 - August 2017

- Developed site service with 6 other engineers in an agile development environment
- Implemented RESTful API endpoints for site service Java, Spring
- Wrote code for testing, querying, saving data to Solr database Java, Spring, Solr
- Wrote behavior driven tests to cover code functionality Java, Spring, Cucumber

Teaching Assistant - Georgia Institute of Technology

August 2016 - May 2017

- Data Structures and Algorithms Java
 - Designed, graded exams for class of over 500 students
 - Designed, graded homework assignments, wrote unit tests for grading submissions Java, JUnit
 - Taught weekly 90 minute recitations, covering material taught in the class
 - Designed practice assignments to help students prepare for exams
 - Held 3 hours of office hours weekly, answering questions and helping students with classwork
 - Built GUI based grading tool to automatically run tests on student submissions and perform static code analysis, flagging suspicious code *TypeScript, Java, Electron, Angular*

Software Engineering Intern - Yobi Technologies

June 2016 - August 2016

- Extreme weather prediction tool for use by central government in northeast India to issue flood warnings to residents used in 4 states with combined populations of over 20 million
 - Implemented tool to map predictions from global climate models to flood prone locations and send SMS alerts to residents on a per location basis Flask, JavaScript, Python
 - Wrote scripts to periodically update weather data in the database Python
 - Built Android application with GPS integration to streamline installation of weather stations Java

Undergraduate Researcher - Georgia Institute of Technology

January 2016 - May 2016

- Simulator to calculate power consumption of mobile device RAM
 - Developed simulator to test memory management algorithm Python
 - Implemented system to simulate memory with multiple sections Python

PROJECTS

'Mapingo' - Location based order tracking application - Runner Up, HackEmory 2017

- Built Android application for submission of food orders and tracking of users using GPS Java
- Created web interface for setting up points of sale, tracking orders and estimating time of arrival based on location and movement speed of users *Angular, JavaScript*

'Edu-Bae' - Customized test generation algorithm - Third Place Winner, Georgia Tech Appathon 2016

- Implemented algorithm for custom generation of exams for individual students JavaScript
- Built web interface for entering student data, creating questions, generating exams Angular, JavaScript

'WingBuddy' - Home surveillance, automation system - Winner, HackEmory 2016

- Programmed Arduino to interpret sensor data, log room status to server and communicate with Android application over network - C++
- Programmed Raspberry Pi to automatically play music on speaker system based on sensor data Python
- Built Android application to view live feed from sensors, connect with other users in network Java
